Professional Summary

Results-driven Data & Business Analyst and ICT (Business Analysis) graduate, currently a Transformation Data Analyst Intern at Naspers/Prosus working across the Transformation and Naspers Labs space. Hands-on experience in data analysis, Monitoring & Evaluation (M&E), B-BBEE transformation analytics, compliance reporting, financial reconciliation, AI, and data engineering, with prior experience as an AI & Data Engineering Intern at CAPACITI (UVU Africa). Proficient in Python, Power BI, SQL, and Excel, with a track record of building dashboards, trackers, websites, and AI-powered workflows that turn messy data into clear, decision-ready insights. Seeking entry-level roles in Data Analysis, Business Analysis, or related IT/tech and AI fields.

Work Experience

Naspers / Prosus

2026 – Present
Johannesburg

Transformation Data Analyst Intern

- Use AI tools (Claude, Gemini, Toqan) daily to automate reporting, reconciliation, research, and document production.
- Develop structured reports and dashboards communicating key transformation metrics and progress to internal stakeholders and leadership.
- Perform data validation and quality checks using SQL queries to ensure accuracy and consistency of compliance datasets used for regulatory reporting.
- Coordinate the Naspers Labs Youth Mentorship programme end-to-end: built the mentor-booking website, an 18-mentor tracking dashboard, and feedback forms, and manage mentor-mentee scheduling and communications.
- Analyze compliance data to support B-BBEE regulatory reporting and transformation performance tracking.
- Manage monthly B-BBEE compliance submissions and supported the FY26 audit close-off across four auditor streams (including Deloitte ESG), building a ~50-item "Requested vs Submitted" audit tracker and submission log.
- Produce B-BBEE spend-analysis reports from financial journal data — supplier, G/L account, cost centre, and VAT breakdowns — feeding procurement scorecard reporting.
- Perform multi-source reconciliations (supplier invoices vs payment advices vs ledger; scorecard licence purchases vs usage), identifying unposted payments and cross-entity licence discrepancies for management action.
- Manage user administration on the BEE123 B-BBEE scorecard platform — provisioning, controlling, and auditing access across all company scorecards for internal teams and 6+ external partner organisations.
- Co-plan and deliver DE&I events and campaigns in the Transformation space (Mandela Month, Women's Day, Youth Month), building costed event plans and budget models presented to leadership.

CAPACITI (UVU Africa)

AI & Data Engineering Intern

04/2025 – 03/2026

Cape Town

- Built foundational data pipelines to process and structure datasets for analytics projects using Python, Pandas, and Jupyter Notebook.
- Performed data cleaning and preprocessing to improve dataset quality for machine learning models, and applied fairness metrics and bias-mitigation strategies in a bias audit of an income-prediction ML model.
- Created data visualizations and interactive dashboards (Python, Power BI, Streamlit, Matplotlib), including an NLP sentiment analysis dashboard and a student performance analytics dashboard.
- Designed and built websites, interactive web apps, and AI-powered tools — including an ATS-friendly AI resume builder (Gemini API) and an AI educational chatbot (Landbot, Zapier) — using HTML, CSS, JavaScript, and Tailwind CSS.
- Completed formal training in AI methodologies, data engineering, big data, cloud computing, and analytics workflows.
- Twice nominated for the CAPACITI Candidate Spotlight for strong performance and contribution to data engineering projects.

Clicks Retail

11/2024 – 01/2025

Flexi Worker

- Provided customer service and operational support in a fast-paced retail environment, keeping records of sales-related activities in the company database.
- Strengthened communication, teamwork, and problem-solving skills while supporting store operations.

Education

Walter Sisulu University

2024

National Diploma in Information and Communications Technology (Business Analysis)

Gobe Commercial High School

Matric

Skills

Data & Analytics

Excel (Advanced), SQL, Power BI, Python & Pandas, Jupyter Notebook, data visualization, data pipelines, NLP, machine learning, reconciliation, compliance reporting, M&E analytics.

AI & Automation

AI tools & APIs (Claude, Gemini, Toqan, Gemini API), workflow automation, AI assisted analysis and reporting, cloud computing, MS Office Suite.

Programming & Web

HTML, CSS, JavaScript, Tailwind CSS, API integration, Streamlit, Netlify, GitHub.

Soft Skills

Analytical thinking, stakeholder communication, problem solving, collaboration, attention to detail.

Certifications

- Data Engineering Certification
- Microsoft AI & Cybersecurity Fundamentals
- Data Science in Real Life
- Microsoft Digital Literacy Certificate
- Big Data, Artificial Intelligence & Ethics
- Understanding and Visualizing Data with Python
- Cloud & DevOps Bootcamp (Exlearn Technologies)

Achievements

Candidate Spotlight Nominee (2×), CAPACITI

Recognised for strong performance, commitment to learning, and contribution to data engineering projects.

Tech Talent Thursday Finale, Naspers

Mentor-booking website built for the Naspers Labs Youth Mentorship programme showcased at the finale event.

FY26 B-BBEE Verification Completed, Naspers

Supported the end-to-end FY26 B-BBEE verification audit through to final certification — managing evidence submissions across four auditor streams (including Deloitte ESG and EmpowerLogic) — with the company maintaining its B-BBEE contributor level.

WSP/ATR Submission, MICT SETA

Supported the annual Workplace Skills Plan / Annual Training Report submission to MICT SETA — investigated and helped resolve queries on a returned submission, with the corrected resubmission provisionally approved within 24 hours.

Key Projects

AI Educational Chatbot

interactive knowledge assistant for AI fundamentals (Landbot, Zapier).

Naspers Labs Mentorship Platform

mentor-booking website with a filterable 18-mentor directory and session-booking flow; showcased at the Tech Talent Thursday Finale (HTML, CSS, JavaScript, Netlify)

mentorshipmonth.netlify.app

Mentorship Tracker Dashboard

live operations dashboard tracking 18 mentors — bookings, availability, and session status — with automated feedback forms (Google Sheets, Google Forms).

Sentiment Analysis Dashboard

NLP system classifying sentiment trends in customer feedback with interactive dashboards (Python, TextBlob, Streamlit, Matplotlib).

AI Resume Builder

AI-powered, ATS-friendly resume generator (HTML, Tailwind CSS, Gemini API).

Student Performance Analytics Dashboard

cleaned and analysed academic datasets to surface performance trends (Python, Pandas, data visualization).

Bias Audit — Income Prediction Model

applied fairness metrics and bias mitigation to an ML model; presented findings on responsible AI (Python, machine learning).

B-BBEE Audit & Reconciliation Toolkit

FY26 audit submission log, ~50-item tracker across four auditor streams, spend-analysis workbooks, and multi-source reconciliations that surfaced unposted payments and licence discrepancies (Excel, Google Sheets, AI-assisted analysis).
